

Opportunity Alert: Exciting Investment Prospect in a Public OTC Stock

As representatives of Shelton IR Team, it is our privilege to bring to your attention an exciting opportunity in the social media space – American Nortel Communications, Inc. (OTC-ARTM)

American Nortel Communications, Inc. (OTC – ARTM) has been publicly traded since 1979 and has provided worldwide communications. It has formed a division, NewborhoodTalks.com, to take advantage of the explosive growth of social media around the world. NewborhoodTalks.com is a premier social media site providing easy sign up and promoting safe and welcoming interactions among people all over the world. Its amazing success in attracting users to the platform can be attributed to the lack of congestion on the site and allowing users to be at the forefront of new trends.

NewborhoodTalks.com was launched in India and is currently providing many connection features for users. Many sought after internet handles are available on the platform, as well as likes, pokes, common links, who is on and what is trending. Upgrades are continuously underway to provide even more value to the users joining daily. NewborhoodTalks.com continues to be one of the fastest growing social media sites with additional features being added and improved upon by the NewborhoodTalks.com team.

To help you further analyze ARTM, we have attached the last five press releases:

- ❖ 175,000 USERS FOR NEWBORHOODTALKS.COM
- ❖ THE USE OF AI IN ITS PLATFORM FOR NEWBORHOODTALKS.COM
- ❖ HIRING OF A CHIEF TECHNOLOGY OFFICER
- ❖ ADDITION OF A DATING PLATFORM FOR NEWBORHOODTALKS.COM
- ❖ AVAILABILITY OF IOS PLATFORM FOR NEWBORHOODTALKS.COM

ARTM appears to be a hidden gem that is certainly worthy of evaluation: an OTC company that is unique in only having 7.2 million total shares in the public float.

Bill Williams of American Nortel is always ready to answer questions for serious investors and has provided his direct contact information so you may reach him directly.
